DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claim 1 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No. 10/800,757, 10/800,755, 10/800,683, 10/800,766,10/800,681 and 10/800,764. This is a <u>provisional</u> double patenting rejection since the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2616

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishida et al (5,384,674).

Regarding claim 1, Nishida discloses an information recording method (Figs. 1-3, column 3, line 66 to column 4, line 26) for recording information on an information storage medium capable of recording and playing back at least still picture information, comprising steps of :

constructing a first information unit having one still picture information (Fig 2(2); constructing a first group unit which composes of a set of first information units and has a plurality of pieces of still picture information (Fig 2(1); and recording one or more pieces still picture information in the first group unit.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Paruski (5,555,098).

Regarding claim 1, Paruski discloses an information recording method (Figs. 3-5, column 8, line 56 to column 9, line 21) for recording information on an information storage medium capable of recording and playing back at least still picture information, comprising steps of :

constructing a first information unit (image #) having one still picture information (Fig. 5 column 8, line 56 to column 9,line 21);

Application/Control Number: 10/800,626

Art Unit: 2616

constructing a first group unit (520,540) which composes of a set of first information units and has a plurality of pieces of still picture information (Fig. 5, column 8 line 56 to column 9, line 21); and

recording one or more pieces still picture information in the first group unit (column 5 ,lines 1-25 , column 8 line 56 to column 9,line 21).

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Moon et al (6,721,493).

Regarding claim 1, Moon discloses an information recording method (Figs. 2,3,4, column 4, line 38 to column 5 line 62) for recording information on an information storage medium capable of recording and playing back at least still picture information, comprising steps of:

constructing a first information unit (23) having one still picture information (Fig. 3, column 4, lines 39-45);

constructing a first group unit (GVOB) which composes of a set of first information units and has a plurality of pieces of still picture information (Fig.3 column 4 lines 39-55); and

recording one or more pieces still picture information in the first group unit (column 5, lines 28-62, Fig. 13A).

Conclusion

Application/Control Number: 10/800,626

Art Unit: 2616

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toyoda et al teaches a play back apparatus using pointers for accessing the recoded still pictures.
